

SPEEDY GLOVE 2.0

THE NEXT GENERATION OF GLOVE INTEGRITY TESTING

RADIOPHARMA PHARMA ATMP

FASTER SMARTER SAFER

Speedy Glove 2.0 is not just an upgrade, it's a step forward in aseptic glove integrity testing.

Built for the future of pharmaceutical manufacturing, it delivers uncompromising accuracy, effortless usability, and confidence for both operators and quality leaders.

WHY SPEEDY GLOVE 2.0

Pharma teams face relentless pressure: stricter GMP regulations (GMP Annex 1), zero-contamination tolerance, and the demand for efficiency at scale. SpeedyGlove 2.0 was designed to win where it matters most:

- Protecting your product and your people with airtight, validated glove testing.
- Beating downtime Faster cycle times than the market standard.
- Future-proofing your compliance with digital traceability, audit trails, full 21 CFR Part 11 alignment and GMP annex 1 ready.

***This is more than testing.
This is peace of mind
in every production cycle.***

- Extremely fast testing Quicker than the industry standard.
- Complete touchscreen control Usable with gloves, intuitive HMI.
- Wireless connectivity Integrate with your facility network or the Speedy Glove Management System.
- RFID technology Automatic recognition of flange and adaptor.
- Audit-ready traceability Full parameter history, users, and electronic audit trail.
- VPHP compatible Safe introduction into aseptic areas.
- No external connections Fully portable, battery powered.
- Integrated QC tools Built-in calibration check and validation procedures.
- Every barrier system Custom port adapters for any port from 145mm and up.

THE NEW STANDARD

SPEEDY GLOVE

- Bigger, Brighter Screen
- A new wide touchscreen gives operators instant clarity and full control—even while wearing gloves. Every step is simplified, every action guided
- Ergonomic Future-Proof Design
- Modern, intuitive form factor that feels built for today and tomorrow. Designed for comfort, efficiency, and operator confidence
- Illuminated Status Ring
- At-a-glance feedback: green means PASS, red means FAIL. No guesswork, just immediate clarity to move on
- Next-Gen Management Software
- Powerful new SpeedyGlove Management & Control Software delivers seamless reporting, batch integration, and compliance dashboards that QA leaders demand
- Hardware Upgrade for Consistency
- Future-ready internal components deliver reliable, repeatable testing performance for years to come.

Be the first to move!

When regulations tighten and audits arrive, there are two types of companies: those who wait for the last possible moment, and those who are already ready. Speedy Glove 2.0 ensures you're always ahead.

Because in aseptic production, there's no price for second place.
